QUARTERLY GREEN TARIFF SHARED RENEWABLES PROGRAM
PROGRESS REPORT**

I.

INTRODUCTION

Pursuant to Ordering Paragraph (“OP”) 10 of California Public Utilities Commission (“Commission”) Decision (“D.”) 15-01-051 (the “Decision”) Southern California Edison Company (“SCE”) respectfully submits its Quarterly Green Tariff Shared Renewables (“GTSR”) Program Progress Report (“Quarterly Report”) for 2nd Quarter, 2020.

II.

BACKGROUND

On September 28, 2013, Governor Brown signed Senate Bill (“SB”) 43 into law.¹ SB 43 enacted the GTSR Program, a 600 MW statewide program that allows participating utilities’ customers—including local governments, businesses, schools, homeowners, municipal customers, and renters—to meet up to 100% of their energy usage with generation from eligible renewable energy resources. As required by SB 43, all of the electric Investor-Owned Utilities’ (“IOUs”)² filed applications with the Commission requesting approval of GTSR programs consistent with the statute.

On January 29, 2015, the Commission adopted D.15-01-051, implementing a GTSR Program framework and approving the IOUs’ applications with modifications. Among other things, the Commission divided the GTSR Program’s statewide limitation of 600 MW of customer participation among the IOUs. SCE’s share of the statewide limitation is 269 MW.

On May 13, 2015, SCE submitted three advice letters: (1) Advice 3219-E, referred to as the Customer Service Implementation Advice Letter (“CSIAL”), which included a proposed rate design methodology in compliance with the requirements of the Decision and included a calculation of GTSR Program rates for 2015; (2) Advice 3220-E, referred to as the Marketing Implementation Advice Letter (“MIAL”); and (3) Advice 3218-E, referred to as the Joint Procurement Implementation Advice Letter (“JPIAL”), which was jointly filed by the IOUs. On October 1, 2015, the Commission adopted Resolution E-4734 (the “Resolution”), which approved the CSIAL and JPIAL, as modified by the Resolution, and adopted SCE’s rate design methodology and 2015 GTSR Program rates as proposed.³

¹ SB 43 was codified in Cal. Pub. Util. Code § 2831 *et seq.*

² The IOUs include SCE, Pacific Gas and Electric Company, and San Diego Gas & Electric Company.

³ On October 21, 2015, SCE filed Advice 3218-E-A (JPIAL update), 3219-E-A (CSIAL update), and 3297-E (SCE-specific JPIAL tariffs) to comply with the Resolution.

The GTSR Program structure approved by the Commission consists of two elements: (1) a green tariff option (called the “Green Rate” by SCE), allowing customers to source a greater share of their energy needs with renewables, and (2) an enhanced community renewables (“ECR”) option (called the “Community Renewables Program” by SCE), allowing customers to subscribe to renewable energy from community-based projects.⁴

OP 10 of the Decision directs SCE to file several reports as discussed in Section 8 of the Decision. SCE filed its First Annual GTSR Program Progress Report on March 15, 2016 and its first Monthly Report on March 25, 2016. Resolution E-5028 directs SCE to consolidate their reports and filings as described in Appendix 1 of the Resolution. The monthly report cadence will now be a Quarterly Report which covers the following topics:⁵

- A. “Available capacity” data at the most detailed level feasible, updated quarterly, and work to increase the precision of the information over time.
- B. Summary of quarterly advisory group activities, or consultation with CBOs, if any.

Pursuant to the direction in D.15-01-051, SCE respectfully files this Quarterly Report for 2nd Quarter, 2020.

III.

REPORT COMPONENTS

A. Available Capacity

The Decision requires “available capacity” data at the most detailed level feasible, updated quarterly, to be reported with precision of the information increasing over time. Customer demand for SCE’s Green Rate program is met through RE Gaskell West 1 LLC, a 20

⁴ See D.15-01-051 at 3-4.

⁵ See *id.*, at 140-141.

MW solar capacity facility in Rosamond, CA, dedicated to the GTSR program which came online March 23, 2018.

The Decision sets a target capacity for SCE’s GTSR Program of 269 MW, inclusive of 45 MW reserved for Environmental Justice (“EJ”) facilities.

Table 1 presents the current solar capacity procured specifically for the Green Rate (“GR”) and Community Renewables (“CR”) components of the GTSR Program. Capacity defined as coincident system peak load.

TABLE 1: CUMULATIVE GTSR PROCURED CAPACITY (in MW)

Category	Target Capacity	GR Procured to Date	CR Procured to Date	GR Online to Date	CR Online to Date	Capacity Remaining
Unrestricted	224	60	6	20		158
Reserved for EJ	45					45
Total	269	60	6	20		203

Customer enrollment data for the GTSR Program is presented in Table 2. It provides estimated cumulative subscribed capacity for the GR and CR programs by customer type. There are no customer enrollments for the CR program.

TABLE 2: CUMULATIVE GTSR ESTIMATED CUSTOMER ENROLLMENT (in MW)

Category	GR Enrolled Capacity	CR Enrolled Capacity	Total by Type
Residential Customers	24.58	0	24.58
Non-Residential Customers	7.64	0	7.64
Total by Program	32.22	0	32.22

B. Advisory Network Activities

SCE has no advisory network activities to report for Q2 2020.

CONCLUSION

SCE respectfully files the foregoing Quarterly Report pursuant to OP 10 of D.15-01-051.

Respectfully submitted,

JANET S. COMBS
ERIC B. SEZGEN

July 27, 2020

Attachment 1

Enhanced Community Renewables Q2 2020 Quarterly Contract Report

Attachment 1: Enhanced Community Renewables Q2 2020 Quarterly Contract Report

Pursuant to Ordering Paragraph (“OP”) 6 and Appendix 1 of California Public Utilities Commission (“Commission”) Resolution E-5028 Southern California Edison Company (“SCE”) respectfully submits its Quarterly Green Tariff Shared Renewables (“GTSR”) Quarterly Enhanced Community Renewables (“ECR”) Contract Report for 2nd Quarter, 2020.

Contract Summaries to Date. SCE has entered into two ECR contracts to date. The first contract is between SCE and JATON LLC. The second contract is between SCE and Lancaster Energy LLC. Both contracts were approved via advice letter in 2019, however neither were signed in Q4 2019. The JATON LLC Advice Letter (3878-E) was filed on October 16, 2018 and approved on July 9, 2019. The Lancaster Energy LLC Advice Letter (3976-E) was filed on March 28, 2019 and approved on April 27, 2019. The transaction structure, details, and location of these two contracts are listed and summarized below:

JATON LLC

The JATON LLC CR-RAM 3 Power Purchase Agreement is based on SCE’s 2015 Pro Forma Renewable Power PPA, which was accepted by the Commission in D.15-12-025 on December 17, 2015, and a CRRAM Rider (“Rider”), which was approved by SCE’s Advice Letter 3694-E. Except for project specific terms, the PPA and Rider are non-modifiable.

Lancaster Energy LLC

The Lancaster Energy LLC CR-RAM 4 Power Purchase Agreement is based on SCE’s 2017 Pro Forma Renewable Power PPA, which was accepted by the Commission in D.17-12-007 on December 18, 2017, and a CRRAM Rider (“Rider”), which was approved by SCE’s Advice Letter

3790-E. Except for project specific terms, the PPA and Rider are non-modifiable.¹ During the contract execution process, SCE noticed non-substantive reference errors between the 2017 Pro Forma Renewable Power PPA and the Rider. These errors were corrected in the executed PPA and Rider and visible in the redlined version of the both documents found in Confidential Appendix D.

Seller/Parent Company	JATON LLC	5149 Lancaster Energy LLC/Universal Solar Partners
Project Name	Sheep Creek Road Solar Generation Facility	3MW Lancaster Solar Facility
Technology	Solar PV	Solar PV—Single Axis Tracker
Capacity	3 MW	3 MW
Estimated Average Energy (Gigawatt Hours/Year)	6.4	10.7
Forecasted Commercial Operation Date	October 31, 2020	October 31, 2020
Delivery Term	20 years	20 years
Vintage (New/Existing/Repower)	New	New
Location (City and State)	El Mirage, CA 92301	Lancaster, CA 93535
Control Area	California Independent System Operator	California Independent System Operator
Interconnection Point	Kenworth 12kV circuit out of Roadway 115/12 kV substation	Stealth 12kV circuit out of Oasis 66/12kW substation
Interconnection Study/Agreement	Wholesale Distribution Access Tariff 1399	Generating Facility Interconnection Agreement 8469

Attachment 2
Generation Transfer Report

Attachment 2: Generation Transfer Report

Pursuant to Ordering Paragraph (“OP”) 6 and Appendix 1 of California Public Utilities Commission (“Commission”) Resolution E-5028 Southern California Edison Company (“SCE”) respectfully submits its Quarterly Green Tariff Shared Renewables (“GTSR”) Generation Transfer Report.

The GTSR program launched effective February 25, 2016. Since the launch, SCE has transferred 5,562 megawatt-hours (“MWh”) from the RPS program to the GT Account of the GTSR program, at prices of \$91.34/MWh and \$83.51/MWh for 2016 and 2017, respectively. The Cost of Generation transferred for 2016 and 2017, was \$133,265 and \$342,642, respectively. All the generation transferred was through one contract, RE Garland A, LLC.

In 2018, the contract dedicated for the GTSR program, RE Gaskell West 1 LLC, started delivering in February. SCE retired 5,694 MWh of Renewable Energy Credits (“RECs”) in the Western Renewable Energy Generation Information System (“WREGIS”) tracking system in 2019 to the GTSR program for 2018 and transferred the remaining 47,347 MWh of RECs from the GT account to the RPS program at the price of \$75.20/MWh. The cost of the Generation transferred was \$3,560,494.

Green Rate customers’ usage in 2019 was supported by the GTSR dedicated facility, RE Gaskell West 1 LLC. SCE plans to retire 6,435 MWh of RECs in the WREGIS tracking system in 2020 at the price of \$67.18/MWh and with a cost of \$3,093,102. SCE will report the retired RECs to the GTSR program and transferred RECs from the GT account to the RPS program for 2019 in its GTSR Annual Generation Transfer Report, which will be attached to the GTSR 3rd Quarter Progress Report and submitted to the CPUC by October 31, 2020.

Costs associated with this generation transferred for 2016 – 2019 were calculated by multiplying the transferred renewable generation by the cost per MWh of charges as depicted in the table below:

**GENERATION TRANSFERRED BETWEEN
THE RPS AND GTSR PROGRAM**

Year	Transfer Amount (MWh)	Price	From	To	Subscription Amount (MWh)	Generation Transferred Cost	Facility
2016	1,459	\$91.34	RPS	GT	1,459	\$133,265	RE Garland A
2017	4,103	\$83.51	RPS	GT	4,103	\$342,642	RE Garland A
2018	47,347	\$75.20	GT	RPS	5,694	\$3,560,494	RE Gaskell West 1
2019	46,042	\$67.18	GT	RPS	6,435	\$3,093,102	RE Gaskell West 1
